

eSIMS v5. Software suite for fast and easy implant ordering and management.

Compatible with SIMS cabinet

Effective and efficient implant handling

Plugs into existing clinic workflows

eSIMS supports the inventory management of Synthes products and electronic ordering. Analyzing minimal- and maximal stock levels, eSIMS can be set to order automatically. The analysis function of eSIMS also allows for optimized stock planning. Due to its modular design and open interface architecture eSIMS integrates to clinic ERP Systems and connects to Synthes.

Benefits

- Compatible with SIMS cabinet
- Barcode scanner for effective and efficient implant handling
- Plugs into existing clinic workflows and is ready to use from day one
- Higher product availability through lower risk of out of stock situations
- Reliable ordering of items
